Munich – the place for you

»Munich is home to a large number of highly talented IT scientists and software engineers. That makes it an ideal place for us to develop innovations.« **Nelson Mattos, Vice President of Engineering EMEA, Google**

»Munich scores above all for the quality of the location and its vast potential for innovation. Close proximity to one of the best technical universities in the world and a series of internationally respected research organizations had a major influence on our decision in favor of Munich. That is one reason why we set up the head office for GE's operations in German-speaking Europe here – as well as the new GE Healthcare Customer Center and the European Research Center we opened in 2004.« **Georg Knoth, CEO & Regional Executive of General Electric in Germany, Austria and Switzerland**
